

Caleb Copley

Atlanta, GA 30318 | ccopley7@gatech.edu | <https://github.com/ccopley04> | www.linkedin.com/in/caleb-copley-98818b340

EDUCATION

Georgia Institute of Technology (GT), Atlanta, GA May 2027

GPA: 4.00/4.00 | *Bachelor of Computer Science and Minor in Mathematics* | Concentration: Theory and Artificial Intelligence

Zell Miller Scholarship, Faculty Honors Spring 2025, Fall 2026, Spring 2026

Augusta University (AU), Augusta, GA

August 2023 - December 2024

Zell Miller Scholarship, Lillian P and Rattner Scholarship, Dean's List Fall 2023, Spring 2024, and Fall 2024

TECHNICAL SKILLS

Programming Languages: Python (Pandas, Numpy, JAX), C#, C, Java, JavaScript

Other Technical Proficiencies: Unity, Word, PowerPoint, GitHub, Android Studio, Firebase

RELEVANT COURSEWORK

Object-Oriented Programming, Computer Organization, Statistics and Probability, Linear Algebra, Scripting and Automation, Data Structures and Algorithms, Applied Combinatorics, Objects and Design, Introduction to AI, Analysis of Algorithms, Machine Learning, Introduction to Number Theory, Automata and Complexity, Multivariable Calculus, and Discrete Mathematics

PERSONAL PROJECTS

Electronic ARTrium, Software Architect: <https://electronicartrium.ece.gatech.edu/> January 2025 - May 2026

- Developed the immersive exhibit "Bee My Guide", which was enjoyed by 200+ viewers, using the Unity game engine
- Created clear design class diagrams to explain complex technical software in an understandable resource

3 2 1 Draw!, Team Lead and Head Programmer: <https://moonwitchexe.itch.io/three-two-onedraw> August 2025 - January 2026

- Created a series of architecture documents to ensure 90+ contributors could access technical descriptors of the project
- Conducted semi-weekly presentations to 120+ spectators, showcasing productivity and identifying technical challenges
- Ensured project success by prioritizing user experience with consistent collection of play test data from 60+ play testers

SpendWise, Head of Software Architecture and Software Development

August 2025 - December 2025

- Engineered the real-time data synchronization of user's expenses and budgets utilizing Firebase's Firestore
- Led a team of 6 in the adherence of an Agile development cycle and enforced SOLID design principles across four sprints

Coding Portfolio Website, Individual Effort: <https://ccopley04.github.io/>

July 2025 - September 2025

- Developed a website with HTML, CSS, and JavaScript that showcases my personal code and describes my projects
- Architected a scalable front-end to showcase and manage a growing library of 8+ coding projects

Mourning Brew, Game Developer: https://store.steampowered.com/app/3963000/Mourning_Brew/

January 2025 - May 2025

- Worked with team of 80+ contributors to create an indie game which was the recipient of 2025 Silv-E Awards for Best Art
- Implemented frequent user feedback in the creation of an engaging and appealing Unity mini game

Automated Scheduling Processor, Software Developer

January 2024 - May 2024

- Engineered an automation pipeline in Python that converted email data into structured Google Calendar events

JOB EXPERIENCE

Contract Software Developer, ATC AutoCenter, Grovetown, GA

June 2026 - August 2026

- Programmed a model context protocol which allowed Claude to autonomously retrieve data from Tekmetric API endpoints
- Automated weekly performance and payroll data extraction via the Tekmetric API, significantly reducing manual data entry
- Optimized task management by creating individual daily dashboards which provided productivity overviews to 7 technicians

AI Engineer Intern, Creo AI, Evans, GA

May 2026 - August 2026

- Engineered RBAC protocols for an internal suite of 8 agents to ensure sensitive data is restricted to appropriate employees
- Supported a live user base of 20+ companies by debugging and enhancing a B2B discovery and networking feature
- Advised management on optimal AI training architecture and local LLM integration based on hardware limitations

Teaching Assistant, Augusta University, Augusta, GA

August 2024 - December 2024

- Graded a multitude of college-level Python code for syntax and readability to monitor progress of 30+ students
- Utilized a deep understanding of coding principles to simplify complex topics and ensure the understanding of students

Math Instructor, Mathnasium, Evans, GA

May 2023 - December 2024

- Ensured 100+ students in 2nd to 12th grade were able to maintain passing grades in a variety of math classes
- Trained 10 instructors on administrative processes and student interactions so they could productively work unsupervised

ADDITIONAL SKILLS AND INTERESTS

Current Student Organizations: GT Honors Program, Video Game Dev Club, Transfer Student Association, Board Game Club

Interests: Board Games, Game Design and Design Principles, Deckbuilding Video Games, and Puzzles

Career Competencies: Teaching, Communication, Organization, Critical Thinking, Problem Solving, and Management
